AUSBIOTECH 2011 CONFERENCE SPEAKERS' PROFILE

Dr Anne M. Collins
Associate Director, One 2 One BioServices
Hospira Adelaide, Australia

Dr Anne Collins has nearly 20 years international experience in bio/pharmaceutical development and commercialisation.

Anne leads Hospira's One 2 One BioServices' business where she is responsible for implementation of the strategic objectives and general management of the business operations. Anne leads collaborations across Hospira's global biologics platform to provide biologics process development and manufacturing services to One 2 One BioServices customers. Working with customers to design customized process development and manufacturing solutions that align with regulatory, IP, clinical and commercial strategies is an area of Anne's expertise.

With a career that has taken her from the United Kingdom to Australia and New Zealand, Anne was previously a consultant with Virient, a company providing business development, technical and management services to emerging and established biotechnology and pharmaceutical companies. Prior to her role with Virient, Anne worked for Mayne Pharma specialising in the international technology transfer, development and manufacture of a first in class biopharmaceutical for early stage clinical trials and the CMC due diligence of biogeneric molecules for in-licensing opportunities.

In the United Kingdom Anne worked for the Beaufour Ipsen Group as Manager, Technical Affairs, a cross functional role with responsibilities interfacing with commercial manufacture, quality assurance, regulatory affairs, clinical and marketing activities providing on-market technical and regulatory CMC support to small molecule and biological therapeutics.

Anne holds a BSc(Honours) in Cell Biology (Oxford Polytechnic, UK) and both a MSc (Distinction) and PhD in Biochemical Engineering from University College London, UK. Anne is currently studying for an MBA (Adelaide University). Anne is located in Hospira's Adelaide facility.
