AUSBIOTECH 2011 CONFERENCE SPEAKERS' PROFILE

Dr Paul D. R. MacLeman
CEO
Genetic Technologies Limited

Dr. MacLeman is CEO of dual ASX/NASDAQ listed company Genetic Technologies (GTG). With operations and laboratories in Australia and the USA, Genetic Technologies is the largest private genetic testing company in Asia-Pacific. Under Dr MacLeman's stewardship, GTG is two years into a five year strategy to focus the Company on the rapidly growing molecular diagnostics market. With the 2010 acquisition and the 2011 US launch of the breast cancer diagnostic test - BREVAGen™ accompanied by the fact that GTG is the first Australian company to achieve CLIA registration under US Centers for Medicare and Medicaid Services, the Company is well placed to achieve its goals.

For the year ending 2011, under the management of Dr MacLeman GTG delivered its maiden profit.

Dr MacLeman is Chairman of AusBiotech's Agricultural, Environmental and Industrial Advisory Committee and was CEO of venture capital funded Hatchtech Pty. Limited where he led the company from research through to international Phase II human clinical trials. Prior to this, he was CEO of Imugene Ltd. and VP Animal Health at Agenix Ltd. Dr. MacLeman has also previously founded life sciences start-ups in the biologics area and has worked in investment banking focusing on the analysis and financing of technology companies.
