AUSBIOTECH 2011 CONFERENCE SPEAKERS' PROFILE

Dr Robyn Heath
Senior VP Product Development
Hexima Limited, Australia

Dr Robyn Heath is one of Hexima's founding scientists and leads Hexima's Product Development Team within the School of Botany at The University of Melbourne.

Dr Heath established Hexima's cotton transformation capability and organised and delivered Hexima's first field trials. She is currently leading programs to introduce Hexima's proprietary genes into corn, cotton and canola.

As part of the collaboration with DuPont she is building the team's capabilities in corn transformation as well as evaluation of plants for resistance to the major corn pathogens.

Dr Heath has extensive research and management experience in both Government and university laboratories. She was previously a Director of Hexima Limited.
